ABOUT

Computer Science Engineering student specializing in **Artificial Intelligence and Machine Learning**, with a strong interest in building intelligent, real-world applications. Skilled in Python, Java, Machine Learning, Deep Learning, Generative AI, with hands-on experience developing and deploying AI-powered projects. Strong problem-solving skills with a solid foundation in Data Structures and Algorithms.

EDUCATION

Year	Degree / Program	Institute	Univ./Board	Score
2027	B.Tech in CSE-AIML	Lakshmi Narain College of Technology, Bhopal	RGPV	8.09/10
2022	Class XII	St. Mary's Convent School, Petlawad	CBSE	76.6%
2020	Class X	St. Mary's Convent School, Petlawad	CBSE	86.4%

SKILLS

Programming	Python, Java, C, SQL
Machine Learning	Scikit-learn, Pandas, NumPy, Classification, Regression, Ensemble Learning, Clustering, PCA, Anomaly Detection, Feature Engineering
Deep Learning & Vision	TensorFlow, Keras, PyTorch, FNN, CNN, RNN, YOLO, SSD, Faster R-CNN, OpenCV, NLP (spaCy), Reinforcement Learning
Generative AI	Transformers, Sentence Embeddings, GANs, RAG, OpenAI APIs, Agentic AI
Core CS	Data Structures & Algorithms, OOP, Database Management
Web & Deployment	HTML, CSS, JavaScript, Django, Flask, FastAPI, Streamlit, Supabase, Docker, Render
Tools	Git, GitHub, VSCode, Google Colab, JupyterLab, Canva, Figma

PROJECTS

ResumeIQ – AI Resume Analyzer [\[GitHub\]](#) [\[Live Demo\]](#) *Python | FastAPI | Streamlit | spaCy | Groq | Supabase | Docker*

- Built and deployed a full-stack AI resume analyzer: users upload a PDF/DOC/DOCX resume and a job description and receive extracted skills, a job-fit score, and High/Moderate/Low feedback. **Streamlit Cloud** frontend with **FastAPI** backend on **Render**.
- Built a resilient resume parser using **pdfplumber** with a PyPDF2 fallback and python-docx, and extracted skills with **spaCy NER**.
- Developed a hybrid job-description matcher combining **RapidFuzz** keyword matching (60%) with **MiniLM sentence embeddings** on ONNX Runtime (40%), so matching works on meaning and not only exact words.
- Created a **5-factor ATS scoring engine** (formatting, keywords, content, skill validation, ATS compatibility) with JD-keyword penalties and score caps, plus a **skill-validation** module that checks whether claimed skills are supported by project work.
- Integrated a **Groq-hosted LLM** for improvement suggestions, **Supabase** authentication (email/password and Google OAuth) with saved analysis history, and **PDF report** export. Designed the UI in **Figma** and built it with Streamlit and custom HTML/CSS.

CreditWise – AI Loan Intelligence System [\[GitHub\]](#) [\[Live Demo\]](#) *Python | Django | Scikit-learn | Pandas | JavaScript*

- Prepared a 975,800-record synthetic Indian loan dataset (published on Kaggle): mean/mode imputation for missing values, 3×IQR outlier removal, label and one-hot encoding, and exploratory data analysis (EDA).
- Engineered **Credit Score²**, **DTI²**, and **Collateral Ratio** features (Credit Score squared and DTI squared showed the strongest correlation with approval) and dropped redundant columns to reduce multicollinearity, giving 27 final features.
- Compared Logistic Regression, KNN, Gaussian Naive Bayes, and Decision Tree on the same 80/20 split, tuned max_depth, and selected a **Decision Tree** (depth 15): **87.1%** accuracy and **77.4%** F1 Score
- Built a **Django** web app that returns approval probability, key-factor analysis, and personalized improvement tips, with an automatic DTI calculator and an EMI calculator (reducing-balance, flat, compound) with an amortization schedule and donut chart. Deployed on **Render** (Gunicorn, WhiteNoise).

Real-Time Object Detection System [\[GitHub\]](#) *Python | TensorFlow | Keras | OpenCV | YOLO | Faster R-CNN*

- Built an object detection system that detects objects in images and live webcam video using pretrained **YOLO**, **SSD MobileNet V2**, and **Faster R-CNN** models with **OpenCV**.
- Displayed each detected object with a label, confidence score, and bounding box, and filtered out low-confidence detections.
- Trained a custom **CNN** detection model in Keras and compared inference speed: the custom CNN ran at about 30-40 FPS and **YOLO** at about 150 FPS.

CERTIFICATIONS

- Prime AIML Batch – **Apna College**;
- Artificial Intelligence and Machine Learning – **AWS Academy**
- Prompt Design in Vertex AI Skill Badge – **Google Cloud**
- CCNA Series, Python Essentials 1 & 2, Modern AI, Data Science & IoT – **Cisco Networking Academy**
- OpenEDG Python Professional, GenAI, Python, JavaScript & AI Fundamentals – **LinkedIn Learning**

ACHIEVEMENTS

- GATE 2026: All India Rank (AIR) 18644.
- Solved 300+ Data Structures and Algorithms problems.
- Selected for Specialist Programmer role at Infosys through campus placement.
